Mod. 841-842

### Funzionamento - Funktion

Bypass

In servizio - In Betrieb

Nota : nella posizione di servizio, la valvola a doppia azione all'ingresso dei modelli a 2 valvole deve essere completamente aperta per evitare perdite di durezza.

Hinweis : In der Betriebsstellung muss das doppeltwirkende Ventil am Einlass von 2-Ventil-Modellen vollständig geöffnet sein, um ein Austreten von Härte zu vermeiden.

Per i professionisti dell'acqua, del riscaldamento e dell'impianto idraulico, Calcocid offre soluzioni tecnologiche all'avanguardia per combattere efficacemente il calcare e migliorare la qualità dell'acqua potabile.

Für Wasser-, Heizungs- und Sanitäranlagenprofis bietet Calcocid Lösungen der Spitzentechnologie, um wirksam Kalk zu bekämpfen und die Qualität des Trinkwassers zu verbessern.
